

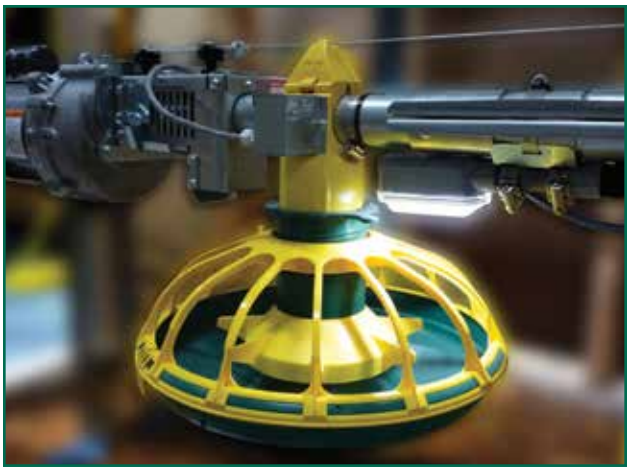
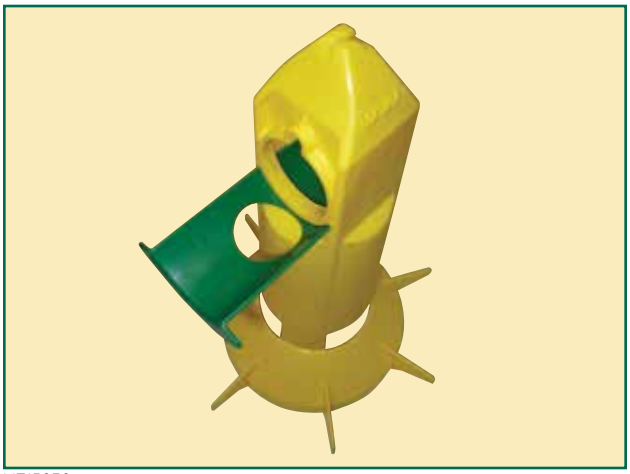
Feeding With Lots of Options

The **FUZE ProLine Feeders** allow you to mix & match interchangeable components – various pans, towers, & grills – to "custom build" the feeder that is right for your particular live production needs.





- All grills are designed to provide generous spacing for today's breeds of birds; and easy in and out of the pan for brooding chicks.
- Three large feed windows for automatic and even pan flooding with feed
- An optional end control unit bird attracting light – LED lights that emit wavelengths known to attract birds
- A slide shutoff is optional, allowing you to stop the feed supply to individual feeders without disrupting others on your line
