

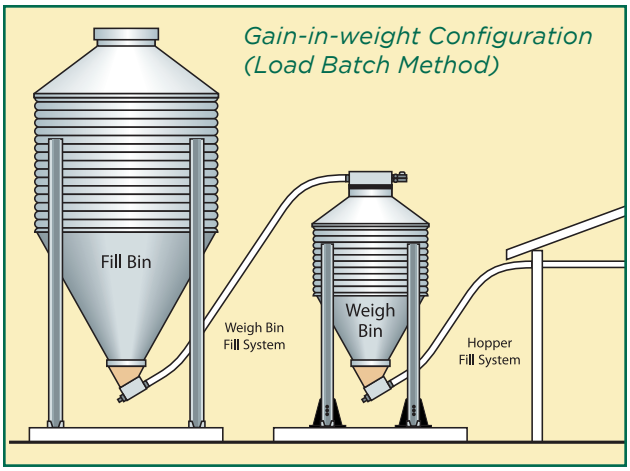
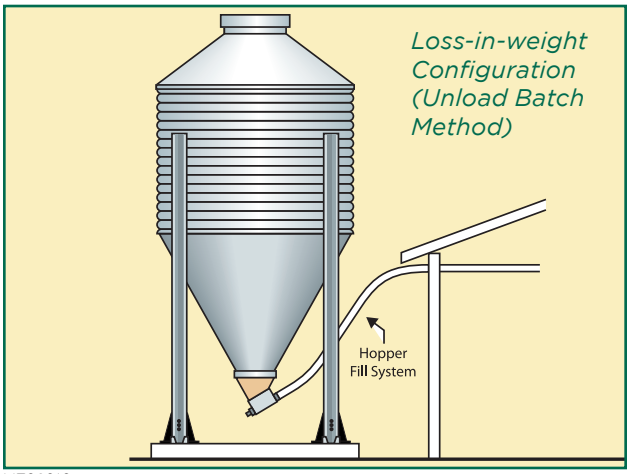
Provide Precise Amounts

BinTrac® Breeder Control Electronic Feed Weighing System – an accurate and reliable bin weighing system, taking the guess work out of your operation.





- Replaces mechanical scales with an integrated solution for bin filling, batching and feed tracking
- Locate the control, which uses low voltage electronics, up to 250 ft. from bin
- Load batch method puts your exact amount of feed in the weigh bin
- Unload batch method draws directly from the bin until your exact amount is delivered
