

Easily Get Bird Weights

The **Sentinel SCALE** from VAL-CO® is a bird weighing system that automatically measures and records the live body weight of your birds, without needing to manually weigh them.

- Fast, precise flock information for proactive management, giving you better control of your production.
- Generates large numbers of weight samples per day without stressing the birds.
- Cuts the cost of labor for manual weighing.
- Intelligent detection of male or female, and is suitable for all types and sizes of birds.
- Large scale surface allows easy access for the birds.
