

# Helping To Keep Your Farm Safe.

## The Sentry Plus™ Disinfectant Delivery System for Vehicle Biosecurity.

Don't overlook a critical step in your biosecurity program - vehicles entering and leaving your facility. The Sentry Plus Vehicle Disinfectant Delivery System can improve the biosecurity on any farm by automatically applying disinfectant to vehicles upon entry and exit. A mist spray covers all sides of any vehicle, including the undercarriage.

The widespread pattern created by the nozzles ensures proper and full coverage of the vehicle.

### Design Features:

- Uses 20 nozzles with a wide spray pattern for better overall coverage
- Nozzles create droplets that are heavy enough to be less affected by wind
- Undercarriage spray helps get hard to reach places on a vehicle
- Operates automatically by motion sensors
- Optional spray wand with 100' hose is available
- Galvanized arch frame kit is also available that is 12' wide x 15' tall to allow for tractor trailers to pass through

The undercarriage spray helps get at hard to reach places on the vehicle, helping to keep your farm safe
