

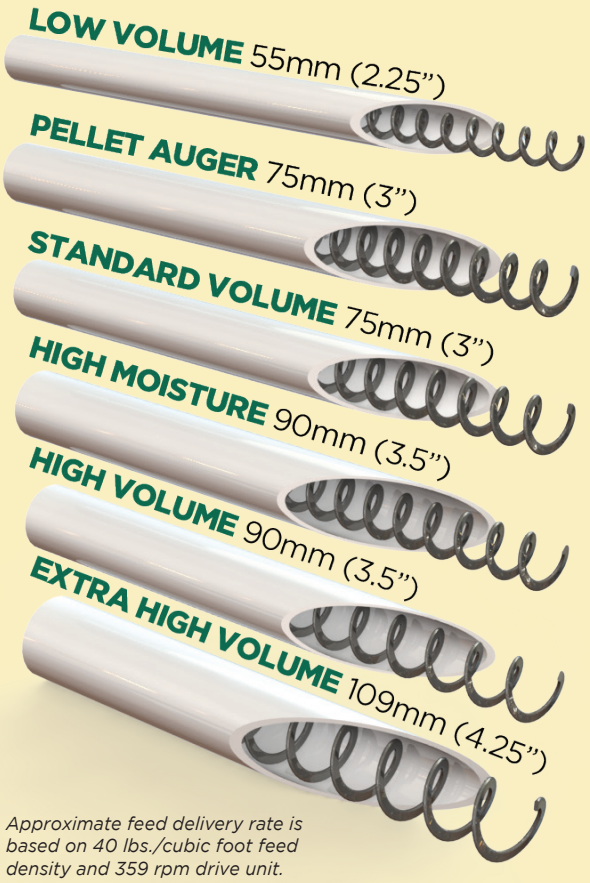
Reliable Feed Delivery

Durable Auger – manufactured by VAL-CO®, in the U.S., the quality control is closely monitored both in-house and at the steel mill.

FLEXIBLE AUGER OPTIONS



Approximate feed delivery rate is based on 40 lbs./cubic foot feed density and 359 rpm drive unit.

- High carbon steel is heat treated and tempered to proprietary specifications to ensure long auger life
- In-line secondary exclusive process to treat the surface of the auger, helping ensure the auger does not crack
- Auger tubes are made with a durable material and UV protection on the outside for maximum longevity
- Feed delivery rate of up to 220 pounds per minute
