

Burn Mizer Saves You Money

The **Burn Mizer** from VAL-CO® saves up to 65% on fuel consumption, utilizing a solid-state heat control to cycle burner on and off while maintaining optimum burn temperature.

- Burning reduces the spread of diseases and keeps rendering trucks off your property.
- The liner reflects rather than absorb heat making it work like an additional burner, operating at hotter and more uniform temperatures. (Fig. A).
- The spiral flame action travels towards the end of the horizontal burning chamber, resulting in a cleaner, more thorough burn. (Fig. B).
- Burn Mizer Cremators quickly turn 100 pounds of carcass to just 1 gallon of ash.
