

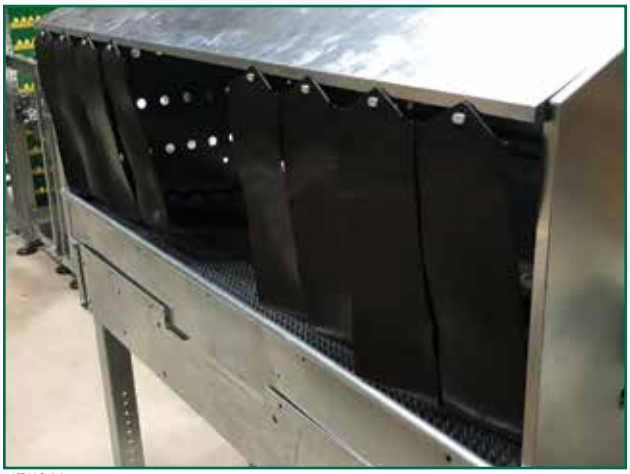
A More Inviting Open Nest

The **Liberty One™ Aviary Colony Nesting System** is designed to make birds comfortable going into an open nest to lay eggs.



- The larger nest holes and nest pads inviting to the birds which helps prevent floor eggs and leads to greater output of high-quality eggs.
- Partition holes provide ideal ventilation and the nest pads provide comfort.
- An expeller pushes birds out when necessary to aid in keeping the nest pads clean and help prevent broodiness.
- Nest measures 48” x 48” (121.9 cm x 121.9 cm), with a belt running through the center, and can house 100 birds (50 per side).
