Rocking Function

Heights are subject to decrease to MAX -30 mm due to feet adjustment

THE BEST SYSTEM FOR BARN AND FREE RANGE EGG PRODUCTION

MAIN FEATURES:

- Length of each module: **114 3/16"** (*2900 mm*)
- Optimum ratio between usable area, feeding space and perches
- One drinking line in front of each nestand one on the 1st floor
- Manure belts on the 1st and 3rd floor, laying nests and "balcony" on the 2nd floor
- The workforce has excellent overview and easy inspection of the system thanks to the strong perch and "balcony" provided
- The "balcony" can be easily removed for cleaning, inspection and maintenance
- Automatic expeller of the hens from the nest with gearbox motor and rocking function
- Balconies are available in solid plastic material or in wire mesh
- Disassembling of the laying nest without any toolfor an easy and fast inspection/cleaning behind it
- Perfect location of feeding and drinking to stimulate the movement of the hens through the floors without blocking the access to the laying nest
- Available with or without "pvc" air ducage ct under the floors
- Feet in stainless steel
- Available also in double decker configuration
- Usable Area:
  with PLASTIC balcony 6,97 yd ^{2} *(5,83 m^2)* per linear meter
  with WIRE MESH balcony ^{5,78} yd ^{2} *(4,83 m^2)* per linear meter
