

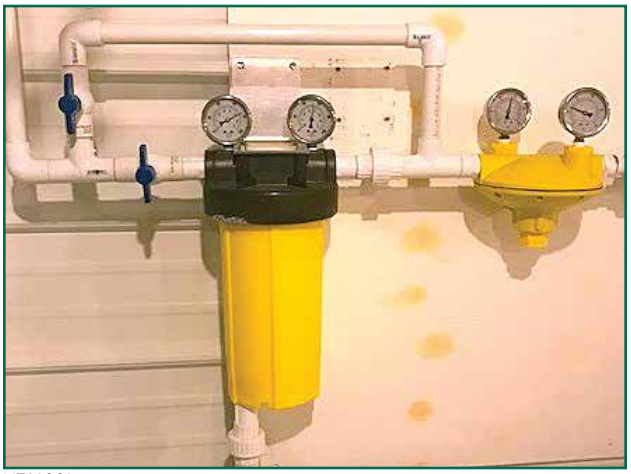
Clear, Clean Water

The **Backflush Water Filter** from VAL-CO® has a patented backflush system that makes it ideal for "whole-house" water filtration in homes, farms, private wells, restaurants, and greenhouses, among other applications.



- This filter can handle up to a 40 gallon flow rate with minimal pressure drop.
- With just the turn of a few knobs, you can reduce suspended sand, silt, scale, rust, unseen particles, foul odors, even the taste of chlorine... for clean, clear water.
- Patented backflush system; reduces filter changes up to 3 to 5 years.
- Minimal maintenance; fast cartridge changes, when needed.
