

Get High Performance Chick Feeding

The patented **UltraStart Chick Feeder** from VAL-CO® features a unique kidney shape that allows the feeder to be situated on the feed line between pan feeders.

The UltraStart Chick Feeder and its accessories are covered under one or more of the following patents: US 9,392,772 B2; D710,059.

Optional kit to allow feeder to be stored on the feed line.

The UltraStart Feeder with the optional hopper extension.

- Designed for use by chicks 1 to 12 days old and can be filled manually or automatically.
- 43 inches (110cm) of trough means more feeding space for chicks than competitors.
- Each feeder can hold 12.28 lbs of feed without the extension and 29.40 lbs with the extension (based on standard 40 lbs/ cubic ft feed).
- Additional accessory options mean that you can fit the feeder to your specific needs.
