

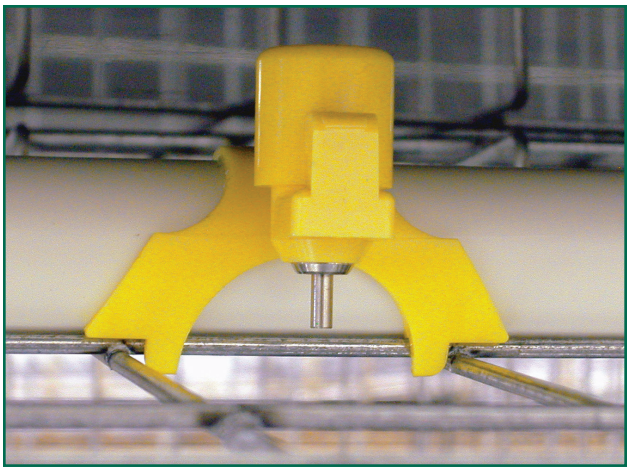
Made For Your Layers

The **Layer Watering System** from VAL-CO is made of high quality stainless steel and durable poly components that increase the longevity of this system.



- We offer a variety of nipple drinkers for your layers, like the Layer Nipple (VBL150), and Aqua-V™ Drinker in standard (VA150), and Precision Feather Action (VA150PFA).
- We also offer multiple saddle options – standard, 45° open saddle (shown left), and 45° closed saddle.
- Round or square pipe available.
- The Start-Grow bracket holds two VAL-CO drinkers - one on each side of the cage partition - with easy height adjustment
