HOW TO ORDER A FLAT CHAIN FLOOR FEEDER

After layout of floor chain feeder line or lines are determined, order the following components as needed to complete your flat chain feeder order:

- ▶ Select drive and/or auxillary fill hopper as needed from pages 14-04 & 14-05. Also select extension hoppers if required.
- ▶ **BELT DRIVE:** After checking recommended horsepower requirement on page 14-03, select pulley & belt kit(s) from pages 14-06 & 14-07. Note that 2-way drive hoppers require two motors and two pulley & belt kits.
- ▶ **DIRECT DRIVE:** After checking recommended horsepower requirement on page 14-03, select correct direct drive frame & gearbox unit on page 14-09 and correct motor from page 14-10. If chain feeder is for pullets, also select (1) 421800 per drive.
- ▶ Select farm duty motor(s) from listing on page 14-08.
- ▶ If platform scale & accessories are to be used, select from listing on page 14-11.
- ▶ Select corners from page 14-12. If chain feeder is for pullets, also select 1 corner chick guard per corner.
- ▶ Select proper quantity of chain from page 14-12. Note that chain is only sold in 50' increments. Also select at least one chain breaker tool per house.
- ▶ If required, select number of outlet drops need from page 14-12.
- ▶ Select hen or pullet trough, trough couplers and hangers/stands from listing on pages 14-13 thru 14-14.
- ▶ Select wire grill as needed from listings on pages 14-17 thru 14-20. Note the special production charge for grills on pages 14-17 thru 14-20. Also select grill end caps on page 14-16 (2 per corner + 2 per hopper outlet) when using male exclusion grill.
- ▶ If winching is required, select winching components needed from listing in section 19 of this catalog. Chain feeder system weighs approximately 4.5 pounds (2.0 kgs.) per lineal foot with feed in the trough.
- ▶ Approximate Feed Delivery Rates per minute based on material @ 40 lbs. per cubic foot:

@ 60 fpm	30 - 100 lbs.	13.6 - 45.4 kgs.
@ 90 fpm	45 - 125 lbs.	20.4 - 56.7 kgs.
@ 120 fpm	60 - 150 lbs.	27.2 - 68.0 kgs.

- ▶ Feed delivery rates are approximate only and subject to variables such as feed density and moisture content.

- ▶ Trough space requirement per bird:

Broilers	2 - 3"	(5.1 - 7.6 cm)
Pullets	4.5 - 6"	(11.4 - 15.2 cm)
Broiler Breeders	4.5 - 6"	(11.4 - 15.2 cm)

- ▶ Each linear foot of trough equals 24" (61cm) of trough space.
- ▶ For assistance in figuring flat chain cage feeding, please contact your sales representative or the customer service department.

HORSEPOWER RECOMMENDATIONS FOR FLAT CHAIN FEEDER

BELT DRIVE - 1 Drive per Chain Loop

CHAIN SPEED PER MINUTE	TOTAL CHAIN LENGTH (up to but not including)									
	To 400' 122m	500' 152m	600' 183m	700' 213m	800' 244m	900' 274m	1000' 305m	1100' 335m	1200' 366m	
20-40 Feet 6-12 Meters	.75 hp		1.00 hp		1.50 hp					
60 Feet 18 Meters	1.00 hp		1.50 hp			2.00 hp				
80-90 Feet 24-27 Meters	1.00 hp	1.50 hp		2.0 hp						
120 Feet 36 Meters	3.00 hp**									

BELT DRIVE, 2 Drives per Chain Loop

CHAIN SPEED PER MINUTE	TOTAL CHAIN LENGTH (up to but not including)										
	To 400' 122m	500' 152m	600' 183m	700' 213m	800' 244m	900' 274m	1000' 305m	1100' 335m	1200' 366m		
20-40 Feet 6-12 Meters	.75 hp				1.00 hp			1.50 hp			
60 Feet 18 Meters	.75 hp		1.00 hp			1.50 hp		2.00 hp			
80-90 Feet 24-27 Meters	.75 hp	1.00 hp		1.50 hp			2.00 hp				
120 Feet 36 Meters	3.00 hp**										

Note: Table lists HP per drive. Space drives equidistant from each other in the loop.

DIRECT DRIVE - 1 Drive per Chain Loop

CHAIN SPEED PER MINUTE	TOTAL CHAIN LENGTH (up to but not including)									
	To 400'	500'	600'	700'	800'	900'	1000'	1100'	1200'	
	122m	152m	183m	213m	244m	274m	305m	335m	366m	
60 Feet 18 Meters	1.00 HP		1.50 hp			2.00 hp				
90 Feet 27 Meters	1.00 hp	1.50 hp		2.00 hp						
120 Feet 36 Meters	2.00 hp									

DIRECT DRIVE, 2 Drives per Chain Loop

CHAIN SPEED PER MINUTE	TOTAL CHAIN LENGTH (up to but not including)									
	To 400'	500'	600'	700'	800'	900'	1000'	1100'	1200'	
	122m	152m	183m	213m	244m	274m	305m	335m	366m	
60 Feet 18 Meters	.75 HP		1.00 hp			1.50 hp		2.00 hp		
90 Feet 27 Meters	.75 hp	1.00 hp		1.50 hp			2.00 hp			
120 Feet 36 Meters	1.50 hp			2.00 hp						

Note: Table lists HP per drive. Space drives equidistant from each other in the loop.

** 3 HP motor (high rpm) recommended for all 120fpm circuits with belt drive.

TO ORDER A COMPLETE INDEPENDENT DIRECT DRIVE UNIT WITH MOTOR

1. Determine chain speed desired and horsepower requirement (see chart on page 14-03).
2. Order correct frame & gearbox unit from listing below, after determining chain speed & horsepower requirement.
3. Order correct motor from page 14-10.

411048	Floor Stand Only for Corner - Stainless Steel	2.4	1.1	
410597	VAL-CO Corner Chick Guard for Pullet Trough*	0.4	0.2	
410598	VAL-CO Corner Chick Guard for Hen Trough*	0.5	0.2	

* Set corner chick guard height high enough to prevent feed build-up and low enough to not allow a chick to get under.

Helps to minimize the chances of chicks getting entangled in feed corners, but cannot prevent chicks from injury if chain is running while birds have access to the chain feeding system.

420320	8" Floor Trough Coupler Less Stand	2.9	1.3	

Notes Regarding Selection of Short Trough Sections

Choose the below part numbers for shorter length hen and pullet troughs. These can be used at the ends of lines and will come with factory cut ends for ease of installation. Choose the short trough part number according to what outside of trough dimension and hen or pullet trough. Be careful to consider hopper placement. Some hoppers cannot be placed directly opposite from each other depending on the trough outside dimension. Reference below recommendations. If hoppers cannot be placed directly opposite, they can fit if offset from one another.

3 ft. outside: 1 line suspended hoppers will fit opposite each other with gap between. 2 line & 4 line suspended hoppers will not. All floor hoppers will not.

4 ft. outside: 1 line & 2 line suspended hoppers will fit opposite each other with gap between. 4 line suspended will not. All floor hoppers will not.

5 ft. outside: All suspended hoppers will fit opposite each other. All floor hoppers will not.

New Hen #	Description
420326	Hen trough, for 4 ft. outside of trough dimension (29.75 in. long)
420327	Hen trough, for 5 ft. outside of trough dimension (41.75 in. long)

New pullet #	Description
420328	Pullet trough, for 3 ft. outside of trough dimension (17.75 in. long)
420329	Pullet trough, for 4 ft. outside of trough dimension (29.75 in. long)
420330	Pullet trough, for 5 ft. outside of trough dimension (41.75 in. long)

TO ORDER A COMPLETE NARROW LOOP FEEDER:

- Order (1) hopper, (1) motor (see pages 14-03 and 14-10), (1) direct drive (see page 14-09), and (4) corners (and extension hopper if desired)
- Select desired length of hen trough, chain, and choice of grill (max 360' total length - 724' of chain length), couplers, grill caps, and hangers
- Order winching and suspension cable as needed, supporting as per hen standard hen trough
Industry Standard for Male Breeders is 7 linear inches of trough space per bird.
Minimum recommended feed is 0.7 lb. (.45 kg) for every 1' (0.3 m) of length of system or 2' of trough; for a 360' (110m) long system, a minimum of 250 lbs. (114 kg) of feed is recommended to ensure feed will get around the entire system.
- Order (1) 411071 trough spacer every 30' of total length of system.

Manual Feed Troughs

How to Order

1. Order 2 420980
2. Overall length divided by 10' or 12' to get the number of trough pieces.
3. Order 1 420980 & 420992 for every trough piece ordered
