

The 2-Tier Community Nest increases bird capacity within the same footprint (and can be wired into the same controls for ease of use!).

The Community Nest from VAL-CO is very inviting to your birds.

Create A Happy Community!

VAL-CO® Community Nest

VAL-CO Community Nests are high quality, water-resistant nests that can be easily assembled on-site. The hen-friendly design includes a gentle expeller to prevent hens from brooding, nest pads with holes to keep the eggs cleaner, and a sloped nest bottom to allow the eggs to safely roll on to the center belt. The nest pads are comfortable and inviting to the hens, which helps prevent floor eggs, and leads to greater output of high-quality eggs.

Features:

- Flat top or shingled styles available
- Designed for quick assembly
- High-rise or floor mounted, with multiple leg lengths available
- Use of washable plastic tops and partitions
 - Low noise environment creates superior laying conditions
 - Easy to clean, unfriendly to bacteria & mites
- Perforated mats enhance egg cleanliness
- Long-lasting galvanized wire components

With slide together components, assembly is simple.

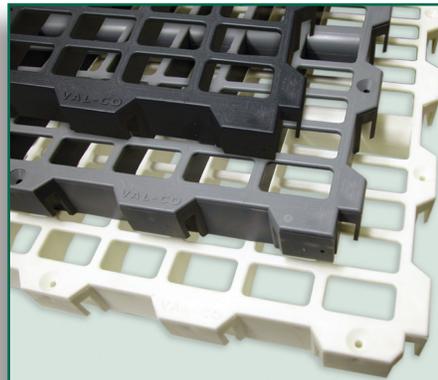

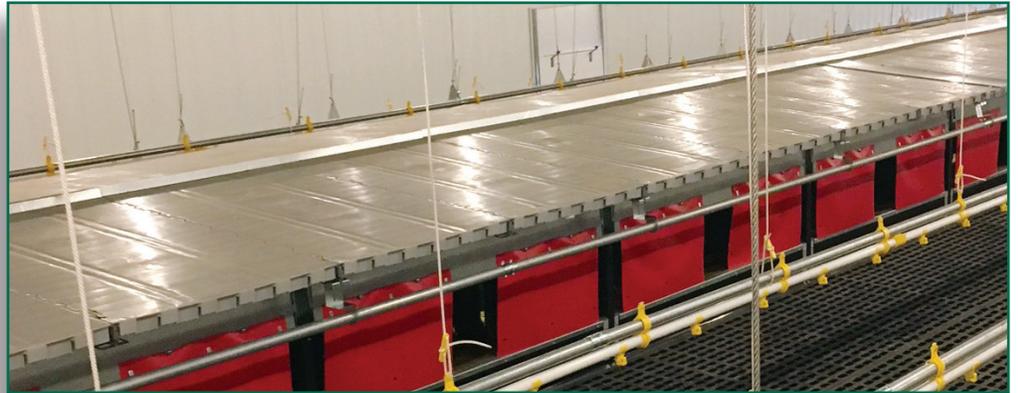

The shingled top (left) and the flat top top (below) are the two styles available for the VAL-CO Community Nest.

Poultry Flooring

Our wear resistant, rugged, polypropylene poultry slat, made from new, untouched material, can be used on galvanized metal frames, fiberglass rail support systems, or wood frames. The slip resistant surface with 1" x 1 5/8" openings cuts cleaning time and will improve your bio-security since it will not harbor bacteria. Available black, gray, and white.

Call your local **VAL-CO** representative or distributor for more information on this and other fine quality products.
