

# Touch Here For Better Environmental Control!

The *Ventra XT™* Controller from VAL-CO® provides many ways to a better environment.

VAL-CO® is proud to introduce the Ventra XT Controller with a revolutionary 7" touch screen display that gives you control.

## Features & Benefits:

- **Large 7" Touch Screen Display:** Swipe screen navigation with a backlit display activated by a built-in proximity sensor.
- **Increased History Logging Information:** For better tracking.
- **Intuitive User Interface:** Easy to learn... in fact, current Ventra PRO users will see there is little to no learning curve.
- **Modern barn ready:** Includes 24 analog inputs along with 12 analog outputs and logic capable of controlling variable heaters, VFD fans, and variable lights to help you obtain greater efficiency.
- **CO, NH<sub>3</sub> & CO<sub>2</sub> sensing:** For greater indoor air control.
- **Humidity Control with optional Heat Purge:** Heated air holds more moisture, so less air needs to be exhausted to remove moisture, and gentler temperature swing is easier on the animals for improved health.
- **Access Remotely:** Capable of accessing controller through our VLink™ software.

VLink™

### Remote Access

To Ventra controllers via the Internet or local RS-485 network

### Monitor Current Conditions

With the ability to view controller history

### Change Controller Settings

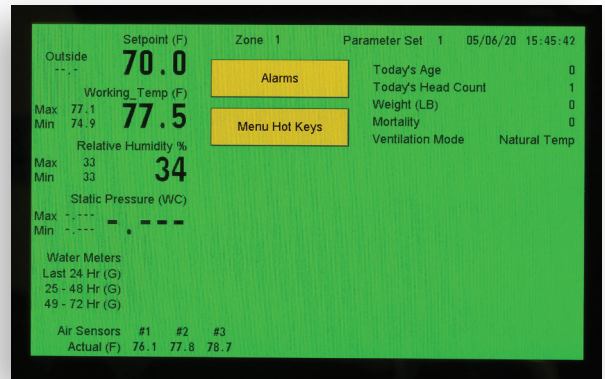

Remotely update settings through the web

### Get Text Alerts

Capable of text or email alerts upon detecting alarms (an external alarm system is required)

## Ventra XT™ Home Screen

The Home Screen now shows several current environmental conditions. You can access the Main Menu Guide from the Menu Hot Keys button or by swiping right to left.

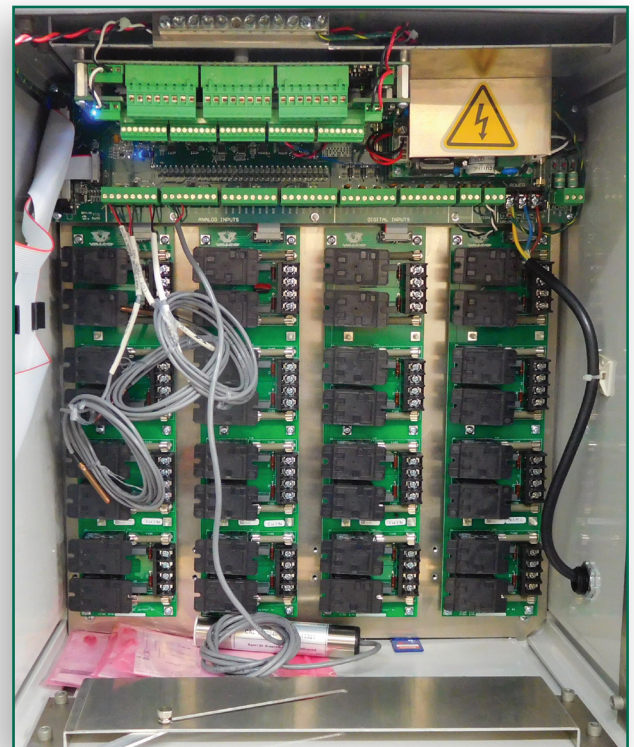

From the Alarms tab you can quickly access the Alarm History Detail page.

## Ventra XT Hardware

When looking inside the Ventra XT, you'll see some familiar items from the Ventra™ PRO like the same Interconnect board and the same Relay boards with plug & play relays. Some of the new items you will see are:

- A new 12 Channel Analog Output (0 – 10 volt) board
- A new additional 14 Channel Analog Input board with +12v & +24v inputs available
- A new HMI board with SD card & added video graphics card

Call your local VAL-CO representative or distributor for more information on these and our other fine products.
