

Move A Lot of Air!

The quadrant design of the Mach 57 allows you to get more fans shipped in a smaller space, when ordering unassembled fans!

The Mach 57™ from VAL-CO is a large 57" exterior mount fan that produces increased airspeed and provides fantastic performance. The interior is black to help with light control. The blade is galvanized with a lot of the interior components made from corrosive resistant materials. The fiberglass housing gives greater longevity. The Mach 57 uses a lot of the same components as our 54" fans, which helps with keeping repair parts on the shelf. If you have a 2x6 wall, nothing protrudes inside the house. By using a common rough opening, the Mach 57 is ideal for retrofits!

CFM vs. Static Pressure (Inches WC)
