

Let's Talk Turkey... Feeders

The **Turkey Feeders** from VAL-CO® are available for all ages and provide top performance and results that save you time and money.

- The PEAK Poult Feeder allows for maximum feeding space and easy access for your birds all around the pan.
- There is no need for individual pan settings as a single winch adjusts all pans in a section.
- The PTF Turkey Pan Feeder has an ample and deep poly pan that offers sufficient space for the growing turkeys & avoids feed waste.
- The PTF provides even feed distribution and is self-leveling which allows feeder to swing, therefore reducing bruising.

The PTF Adult Turkey Pan Feeder is available with a one-piece tower and a two-piece tower, which makes maintenance much easier!
