

Control The Airflow

The **Galvanized Butterfly Damper Fans** from VAL-CO include state-of-the-art features designed for maximum efficiency and long-lasting performance.

- The damper automatically allows air to flow only in one direction while running, and seals shut when the fan turns off.
- Computer design orifice-blade-cone-motor combination assures optimum use of the motor power curve while reducing starting and running amps.
- Motor mount assembly utilizes a rugged box frame design to improve performance, efficiency, increase motor life and provide quiet operation.
