

The Aurora IR Brooder is available in Liquid Propane (LP) or Natural Gas (NG), and ships fully assembled.

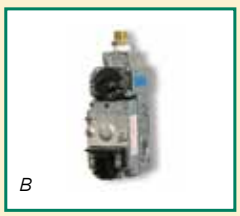

Extra Headroom Included

The **Aurora IR Brooder** from VAL-CO® uses efficient infrared heating technology and was designed to help growers get vehicles through their houses between flocks, without getting in the way.

- The Aurora IR Brooder uses infrared heating technology to quickly and efficiently warm the chicks and floor rather than wasting heat on the air that rises above the brooding area.
- At just under 11” (28 cm), Aurora IR provides extra clearance throughout the house.
- 34” canopy (86 cm) available in either Aluminum or Galvanized with a BTU/Hr rating to 40,000 (10,100 k/cal).
- The High Pressure brooder allows for a smaller supply pipe to reduce cost.
