

Consistent Ventilation Management

The **Ventra Controllers** from VAL-CO offer quality, efficiency, & consistency with round-the-clock monitoring of in-house conditions helping you maintain the best possible environment for each stage of livestock development.

- Innovative Control Logic is an approach to ventilation control that is so advanced it's patented! (U.S. Patent #5,813,599).
- Effective Environmental Temperature (EET) control monitors & adjusts actual temperature settings based on temperature, humidity, air speed and floor type to maintain optimal (age specific) animal comfort.
- Shared Sensor technology (SST) provides ultimate climate control by controlling any device with any sensor.
