

Touch For Better Control

The **Ventra XT** from VAL-CO uses our most advanced logic to give you the best control in today's modern barns – control variable heaters, variable fans and variable lights for maximum efficiency.

- 7" intuitive touch screen with remote access capable through VLink™ software.
- Connect to carbon monoxide, ammonia, and carbon dioxide sensors for perfect indoor conditions, and control humidity with the optional Heat Purge to remove moisture.
- Increased history logging for better data tracking, with easy to read graphing capabilities.
- 24 analog inputs, 12 analog outputs.

VLink provides remote access to the Ventra XT
