

Built To Last

Our **Direct Drive Fan Line** combines high performance and longevity. Engineered for a unique combination of aerodynamic detailing with high efficiency, long-life and worry-free performance.

TranTorque Fitting locks tight on motor shaft, no set screws to loosen and allows easy change-out of blade and motor

Composite Blades offer multi-wing design, cast aluminum hub and individual replacement blades

- Unique four-point stainless steel motor mount design provides minimum air restriction and vibration-free performance.
- Power Miser Direct Drive Fans have custom 230 volt PSC motors and 2- or 3-wire variable speed control options.
- Gradual downward facing slope of the fan whisks moisture away from the building.
- Available in 12”, 16”, 21” and 24” models.
