Poultry Watering Systems

In an effort to provide our customers with the best quality drinkers and regulator housings, VAL-CO looked to GE and their Xenoy® engineering thermoplastic resin. GE's Xenoy® resin is a durable polyester-based material that offers an excellent balance of mechanical strength and chemical resistance. VAL-CO's in-house testing has determined that these new drinker and housing designs, in conjunction with the Xenoy® resin, have strength, durability and reliability.

The Line of Drinkers from VAL-CO®

Our selection of drinkers is hard to beat... and with this many to choose from, we’ve got one that’s right for you!

World Famous Watering Systems from VAL-CO®

VAL-CO manufactures a more complete line of drinkers for broilers, roasters and breeders. We have many options that allow you to select the drinker that best fits your needs.

Our top quality Roaster Drinker is available with additional features at no extra charge, including Hi-Flow, Xtra Hi-Flow and Feather Action. The Hi-Flow option will give an average of 30% more flow than a standard Roaster Drinker. The Xtra Hi-Flow option will double the flow rates and should only be used in extreme climates.

The Precision Feather Action (PFA) option on the Roaster Drinker will give your day old to full grown birds water with the lightest touch in the industry. Available in four flow rates, including Controlled Flow which is ideal for antibiotic-free barns to help control the amount of moisture in the litter.

The Quencher Drinker is designed to match the industry standards for drinkers being offered today. It is engineered to provide Feather Action at competitive prices. The Quencher Drinker is available in two flow rates and is completely adaptable to fit any watering system that uses the VAL-CO Drinker.

Our Breeder Drinker, based on years of experience in the poultry field, will give your birds as much water as they need without wasting a drop. The drinker is activated by pushing up on the trigger pin only; side action will not activate the drinker, which reduces water splashing as active birds bump and brush against the trigger pin. Available in Standard Flow for medium to larger breeders and Controlled Flow for smaller breeders.

These features provide customers with the perfect drinker for their particular applications, resulting in better feed conversion and weight gains. Our drinkers provide the right amount of water every time. That spells success.

Broiler Watering Systems

We have the perfect drinker for your birds. VAL-CO® now manufactures a more complete line of drinkers. We have added options to allow you to select the drinker that best fits your needs. Each drinker provides fresh, clean water. Combined with our easier flushing intakes and white watering lines, this is the coolest broiler watering system around. More fresh water delivered right to your birds.

Features include:

• Locking Saddle – Helps keep the drinker securely in place. Allows for optional use of cups.
• Wide Variety of Drinkers – multiple choices... no wrong answers.
• Folding or Flexible Standpipes to prevent breakage when raising water lines.
• Improved Extra High Flow VR205 Regulator for more water flow.
• Regulator Intake for even easier line flushing.

Components:

- Locking Saddle
- Folding Standpipe
- Extra High Flow VR205
- Breeder Shield

EZ-Flush Intake
Flushing your water lines is even easier and cleaner. With 3/4" hose and openings, the VAL-CO Bigger Intake will flush debris out of the pipe. Just twist the handle to REG, FLUSH or OFF. No additional installation required, just screw into the regulator. In the REG position, the water will be regulated normally with changes made with the knob underneath. In the FLUSH position, water bypasses the seal and flushes into the water lines. In the OFF position, all water flow stops. The EZ-Flush Intake works with all VAL-CO regulators – old & new.

Breeder Watering Systems

We have something to crow about and so will you with this improved Breeder Watering System from VAL-CO®. The Breeder Drinker will give your birds as much water as they need without wasting a drop. This drinker will keep your birds productive throughout the year. Easier flushing intakes and white watering lines make this the coolest system around. More fresh water delivered right to your birds.

Features include:

• Locking Saddle – Helps keep the drinker securely in place. Allows for optional use of cups.
• Breeder Drinker for proper water flow and less waste.
• Hanging Kit for more stability.
• Improved Extra High Flow VR205 Regulator for more water flow.
• Regulator Intake for even easier line flushing.

Components:

- Locking Saddle
- Breeder Drinker
- Breeder Shield
- EZ-Flush Intake
