## TECHNICAL DATA

### Rocking Function

## THE BEST SYSTEM FOR BARN AND FREE RANGE EGG PRODUCTION

### MAIN FEATURES:

- Length of each module: 114.2" (2900 mm)
- Optimum ratio between usable area, feeding space and perches
- Two drinking lines in front of the nest and one drinking line on the 1<sup>st</sup> floor
- Manure belts on the 1<sup>st</sup> and 3<sup>rd</sup> floor, laying nests and "balcony" on the 2<sup>nd</sup> floor
- The workforce has excellent overview and easy inspection of the system thanks to the strong perch and "balcony" provided
- The "balcony" can be easily removed for cleaning, inspection and maintenance
- Automatic expeller of the hens from the nest with gearbox motor and rocking function
- Balconies are available in solid plastic material or in wire mesh
- Disassembling of the laying nest without any tool for an easy and fast inspection/cleaning behind it
- Perfect location of feeding and drinking to stimulate the movement of the hens through the floors without blocking the access to the laying nest
- Feet in stainless steel
- Available also in double decker configuration
