TECHNICAL DATA

MAIN FEATURES:

- Length of each module: 118 7/16" (3008 mm)
- Optimum ratio between usable area, feeding space and perches
- All drinking lines adjustable in height
- Lifting doors for easy access to the colony
- All chicks start brooding on the 1st floor. This helps the operator in the daily inspection during the first weeks of age
- Outside ramps from floor to 1st level
- 1st floor access for the work force for easy inspection, cleaning and catching of the birds
- Lifting platform with adjustable drinking line in order to stimulate the pullets to jump from the second week of age. The platform can be placed from 10 cm. above the 1st floor up to the 2nd floor
- Rigid and continuous protection, placed in the trough between the flat chain and the animals to guarantee an appropriate safe and healthy eating
- Available with or without "pvc" air duct under the cage floors
- Folding outside stepping rail and perch
- Feet in stainless steel
- Available also in double decker configuration
- 5,98 yd² (5 m²) of usable area each linear meter of equipment

Heights are subject to decrease to MAX -30 mm. due to feet adjustment

THE BEST SYSTEM TO REAR PULLETS AND TRAIN THEM ON THE AVIARY SYSTEM.
