

Let's Talk Turkey... Production, That Is.

Whether you're looking for a turkey feeders or drinkers, we have what you need. The VAL-CO® turkey feeders and drinkers provide top performance and results that save you time and money.

The PTF Adult Turkey Pan Feeder

The PTF Turkey Pan Feeder is a multi-adjustable feeder that is easy to handle and gives excellent results. The ample and deep poly pan offers sufficient space for the growing turkeys, avoids feed waste and can easily be removed, exchanged or cleaned.

Features:

- Self-leveling which allows feeder to swing, therefore reducing bruising
- Steel feed level tube can be adjusted in seconds
- Even feed distribution
- Extra strength construction designed to withstand the movements of full-grown turkeys

Hardware to attach to winched feed level line is included

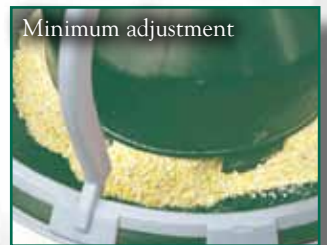

The PXP Turkey Starter Feeder

The PXP Turkey Starter Feeder allows for maximum feeding space and easy access for your birds all around the pan. There is no need for individual pan settings as a single winch adjusts all feed pans in a section, supplying the right amount of feed at all times.

Features:

- Winch controlled feed adjustment
- Wide 13-inch pan with 8 feeding positions
- Easy snap-on plastic grill made from high-impact polypropylene
- Built-in feed saver lip on sturdy plastic pan
- Fits on either smooth or ribbed tube

Performance You Can Count On

Turkey Watering

VAL-CO Turkey Watering can help you raise cleaner and healthier turkeys.

Available in both aluminum channel and conduit line support.

The Big Tom Turkey Cup

Now you can have water access spread out through the house for all your birds. Manufactured with glass-filled structural polymer and stainless steel inserts, the BigTom Turkey Drinker System is tough enough for big toms, yet is small enough for poults. Each cup is a mini-reservoir that can satisfy 30 turkeys up to 7 weeks and 20 turkeys after 7 weeks. And it's easier than ever to use. Simply raise the cups and the water pressure from the front of each line. That's all there is to it!

The TurkeyMAX Bell Drinker

If you're not convinced a cup drinker is right for your turkeys, we have another watering solution for you. The VAL-CO TurkeyMAX Bell Drinker is easy to connect to the VAL-CO Watering System, when using the VAL-CO Adapter Nipple. From a hygienic point of view, the VAL-CO TurkeyMAX is a must for your house. Not only does it provide a reservoir of fresh water for your turkeys, but it's also safe for them to use. The smooth rim helps prevent bruising on the breasts of your birds.

Choose VAL-CO turkey watering for performance you can count on.
