

Provide Accurate & Precise Airflow!

An Investment In Precision and Quality

The VAL-CO® AccuFlow Inlet is the latest advancement in precision air distribution control for poultry and livestock facilities. Developed by combining powerful 3D design software, and digital airflow modeling technology, the innovative curved shape of this new inlet provides precise airflow control when coupled with modern control packages. This level of precision air control is increasingly necessary as today's structures become larger and proper distribution and mixing of inlet air is required to assure an optimized growth environment.

The side seals ensure the airflow is directed where it needs to be.

The VAL-CO AccuFlow Inlet distributes fresh air farther in today's wider buildings.

Features:

- Latest in aerofoil technology design throws air to the center of the building
- Insulated doors minimize condensation
- Reinforced doors seal tightly with industrial weather-stripping
- Side seals assure proper airflow direction
- Injection molded framed components ease assembly
- Full 9" opening size vs. others, with varying lengths available
- Optional bird screen available
- Full length corrosion resistant hinge
- Constructed of tough polymer materials
- Pre-assembled inlet doors minimize installation time

CATALOG #	ITEM DESCRIPTION	ROUGH OPENING	AIR FLOW (CFM)
810022-Q4	CURVED INLET, 9" X 20" *	11.25" X 22.5"	940**
810009-Q4	CURVED INLET, 9" X 42" *	11.25" X 44.5"	1970**
810023-Q4	CURVED INLET, 9" X 54" *	11.25" X 56.5"	2530**

* - Also available in full skid quantities.

** - Per inlet, calculated at 0.1" H₂O
