

NEW PRODUCT RELEASE

VAL-CO Expands its V-Fan line to include 36" metal fans!

Improve your farm's energy efficiency with the VAL-CO V-Fan.

36" Metal V-Fans

VAL-CO has recently expanded its V-Fan line of exhaust fans to include 36" metal fans. Choose between classic galvanized fans or our more rust-resistant "Z" material.

Features & Benefits:

- Over 11,000 CFM at 0.05" WC at full speed
- Up to 43.0 CFM/Watt at 0.05" WC
- No belts to change or bearings to grease
- May be eligible for Energy Rebates in certain areas

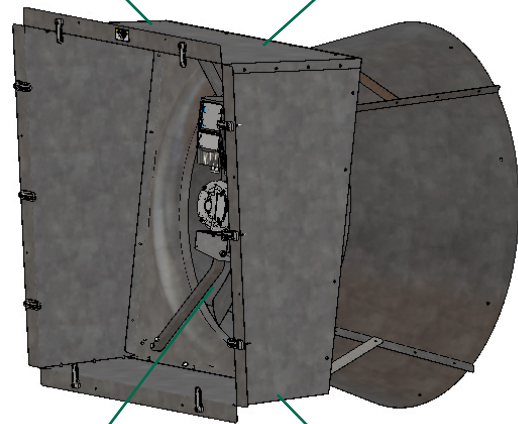

The VAL-CO V-Fan™ is a variable speed, direct drive fan. The V-Fan provides higher total CFM at full speed as well as remarkably high CFM/Watt measurements at low speeds.

On a typical 50' x 500' broiler farm, replacing a standard 36" fan with a V-Fan could save up to \$100/year in electric.

Best Regards,
Sean Francey, General Manager

Z-material fans warranted in poultry applications against rust-through for 7 years!

Can pay for itself in 2-3 years.

High CFM at top speeds. High CFM/watt at low speeds.

No belts to change and no bearings to grease.
