

NEW PRODUCT RELEASE

VAL-CO Expands its Flexible Auger Product Line to Include the NEW Model 740 Auger!

Convey more feed with the Model 740 Auger.

Model 740 Auger (108mm)

VAL-CO has recently expanded its flexible auger product line with the addition of the Model 740 Auger and steel tubes.

Features & Benefits:

- Delivers up to 220 lbs/min at 359 RPM based on 40 lbs/ft³ feed density.
- Conveys dry ground feed and crumble-type mash and pellets.
- Maximum particle size is $\frac{3}{16}$ " diameter by $\frac{1}{2}$ " long.

The Model 740 Auger has an outside diameter of 3.55", and the steel tube has an outside diameter of 4.25". Drops can be used with clear or grey flexible tubes along with telescoping rigid tubes. Tail bearings are greasable and heavy duty to ensure a long service life.

Single and twin boots are available and can be used with standard VAL-CO Slide Valves.

Best Regards,
Sean Francey, General Manager
