

# NEW PRODUCT RELEASE

## VAL-CO Expands its V-Fan™ line to include 36" fiberglass fans!

Improve your farm's energy efficiency with the VAL-CO V-Fan.

### 36" Fiberglass V-Fans

VAL-CO has recently expanded its V-Fan line of exhaust fans to include 36" fiberglass fans.

#### Features & Benefits:

- Over 14,000 CFM at 0.05" WC at full speed
- Up to 43.0 CFM/Watt at 0.05" WC
- No belts to change or bearings to grease
- May be eligible for Energy Rebates in certain areas

The VAL-CO V-Fan™ is a variable speed, direct drive fan. The V-Fan provides higher total CFM at full speed as well as remarkably high CFM/Watt measurements at low speeds.

On a typical 50' x 500' broiler farm, replacing a standard 36" fan with a V-Fan could save hundreds per year in electricity costs!

Best Regards,  
Sean Francey, General Manager

*Can pay for itself in 2-3 years.*

*High CFM at top speeds. High CFM/watt at low speeds.*

*No belts to change and no bearings to grease.*
