## VAL-CO Improves 9' Bin Collar Once Again!

Now easier to install than ever before!

### Reinforced 9' Bin Collar

VAL-CO recently improved the 9' Bin Collar with reinforcements to improve the structural sturdiness of the bin and boot attachment.

Now, it's been improved again to increase the size of the hole opening. The opening is large enough to fit a 1/2" socket through, thereby simplifying the installation process.

#### Features & Benefits:

- Fits a 1/2" socket through the opening for hassle-free installation
- 10-gauge steel to strengthen the boot attachment point and reduce the risk of damage

Best Regards,  
Sean Francey, General Manager
