

# PRODUCT INFORMATION UPDATE

## VAL-CO Introduces Improved 36" NaturalFlo Chimneys!

Chimneys are a critical component of an effective ventilation program.

We recently redesigned our NaturalFlo™ Chimneys for swine barns.

### Changes you should know about:

- Redesigned outer skin is constructed of painted aluminum sheets for long-lasting protection from the elements.
- Redesigned bird netting kits for better bird exclusion and easier installation.

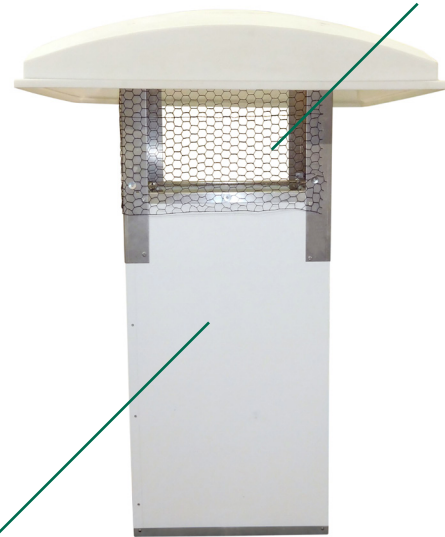

Optional stainless-steel bird netting is now available for the 36" chimneys, as well as 24" chimneys, along with the standard options of PVC-coated galvanized wire and stainless-steel spike strips.

New part numbers have been created throughout the product line for consistency in ordering. You can now buy a complete chimney, or order à la carte.

**The improved VAL-CO NaturalFlo™ Chimney assures years of trouble-free service!**

See the attached catalog section for updated pricing information. Contact your sales representative or customer service representative with any questions.

*Heavy duty stainless-steel or PVC-coated galvanized screens keep birds out of the barn.*

*Painted aluminum sheets are lightweight but extremely durable to provide long-lasting protection from harsh elements.*

Best Regards,
